ENG

The lamp's main structure consists of steel and aluminium. The lamp shade consists of fifteen aluminium blades of 1,5 mm thicknesses, all having the 3-dot pattern (Shurooq Collection Signature Pattern) laser cut placed. The blades slide onto two central disks, then helded by a ring placed on the uppercut of the blades for strong stability. The warm light source is a E27 LED cylindrical bulb, environmentally sustainable and durable, covered by a frosted glass diffuser, guaranteeing full and gentle illumination. The lamp is fixed to the ceiling by a ceiling rose, through a steel wire.

ITA

La struttura principale della lampada è costituita da acciaio e alluminio. Il paralume è composto da quindici lame di alluminio da 1,5 mm, aventi un'incisione in taglio laser con il motivo a 3 punti (motivo distintivo della Collezione Shurooq). Le lame scorrono su due dischi centrali, unite da un anello posto sulla parte superiore delle stesse, per garantire maggiore stabilità. La calda sorgente luminosa è una lampadina LED cilindrica E27, sostenibile per l'ambiente e duratura, coperta da un diffusore in vetro satinato, che assicura un'illuminazione fulgida e delicata. La lampada è fissata a soffitto con un rosone, mediante un cavo di acciaio.

عرب

يتكون الهيكل الرئيسي للمصباح من ترايبود معدني مع صينية خشبية. يتكون الظل من عشرين شفرة معدنية بسمك 1.5 مم ، وجميعها بها نمط ثلاثي القاطط (نمط التجميع) مقطوع بالليزر. تنزلق الشفرات على قرص مركزي ، ممسك بحلقة موضوعة على الجزء العلوي من الشفرات لتحقيق ثبات قوي. مصدر LED E27 ، 105W HSGSA مغطى بناشر زجاج بلوري ، مما ، يضمن إضاءة كاملة ولطيفة. السلك الكهربائي مخفي في إحدى الأرجل لتصميم أنيق.
